EXPERIENCE

ICT INTERN | HORSEBRIDGE NETWORK SYSTEMS EAST AFRICA, NAIROBI
June 2025 – August 2026

- Administered the Znuny IT Service Management platform, logging and tracking incidents and service requests.
- Provided end-user technical support and troubleshot hardware and software issues.
- Assisted with installation, configuration and maintenance of ICT and security systems, including CCTV cameras, biometric locks and gate bollards.
- Assisted with network maintenance and troubleshooting to support reliable connectivity.
- Prepared and maintained technical documentation to support ICT service delivery.
- Supported user account management, antivirus protection and data backup tasks.
- Assisted users with technical issues and communicated troubleshooting steps clearly to non-technical staff.

ICT INTERN | NATIONAL CEREALS AND PRODUCE BOARD (NCPB) HEAD OFFICE, NAIROBI
May 2024 – August 2024

- Provided hands-on Microsoft 365 support to staff, including Outlook and everyday collaboration and productivity tools.
- Supported staff with day-to-day ICT incidents involving hardware, software and user productivity.
- Diagnosed and assisted with repair of ICT equipment and prepared equipment for dispatch to branches.
- Handled repair and dispatch of ICT equipment to branches countrywide, supporting a multi-site ICT environment.
- Maintained ICT equipment documentation and records.
- Assisted with Navision ERP installation and support, and handled staff calls for ICT assistance.

SALES / POS ASSISTANT | GEPHARDT BOOKSHOP LTD, GILGIL

August 2026 - Present

- Operated the point-of-sale system and processed customer sales transactions accurately.
- Assisted customers directly and responded to customer queries.
- Worked with digital transaction systems in a customer-facing environment.

EDUCATION

B.Sc. Information Technology | Meru University of Science and Technology *October 2025*

Computer Installation and Maintenance | Aberdare Institute *2021*

Completed with a credit pass (86%).

TECHNICAL PROJECTS

BiasharaBox – Database-Driven Point-of-Sale & Inventory System

React, Node.js, Express.js, MongoDB, Mongoose

- Designed a database-driven system for sales, inventory, vendors, users and transaction information.
- Created structured data models and implemented CRUD operations, validation and REST APIs using MongoDB and Mongoose.
- Worked with business data including quantities, buying prices, selling prices, margins and transaction records.
- Developed inventory summaries and reporting functionality to support business decision-making.
- Troubleshot database connectivity, API and application integration issues during development.

Find a Technician – Service Booking & Information Management Application

Flutter, Dart, Firebase Authentication, Firebase Firestore

- Designed and implemented structured information storage for users, technicians, bookings and related records.
- Developed authentication, booking management, booking history and technician information features.
- Used Firebase Firestore for storing, retrieving and managing application data.
- Applied data validation and structured information-management principles throughout the application.

ADDITIONAL PROFESSIONAL DEVELOPMENT

- ALX Graphic Design
- Computer Repair and Troubleshooting
- SPSS and STATA
- IBM SkillsBuild – AI Fundamentals
- PLP Academy – Software Development
- Hitachi Vantara: Presales Data Infrastructure, Presales Data Solutions, Presales Data Operations, Solution Selling (valid March 2026–2028)
